PROFILE

Passionate Machine Learning Developer with hands-on experience in building predictive models and AI-based applications using Python, TensorFlow, and scikit-learn. Skilled in data preprocessing, feature engineering, and model optimization for real-world solutions. Strong background in developing and deploying ML models, including NLP and sentiment analysis applications. Proficient in Streamlit, Flask, and web frameworks for delivering end-to-end machine learning solutions. Adept at collaborative problem-solving in agile teams and optimizing workflows with version control tools like Git.

PROFESSIONAL EXPERIENCE

Machine Learning Developer Intern

01/2024 – 06/2024

Metainnovix

- Developed many AI Solution in Edu Spark project and integrating in Mern App along with team members
- Participates in project presentation with senior developer
- Actively Contributed in implementation of new features and improvement in project

PROJECTS

Chatapp using deepseek model

02/2025 – 03/2025

(python, ollama, langchain, streamlit, deepseek 1.5b)

- Built an **AI-powered coding assistant** using **DeepSeek's LLM** (via Ollama) with a Streamlit frontend, enabling real-time code debugging, documentation, and solution design.
- **Multi-Turn Conversations:** Maintained chat history using `st.session_state` for context-aware responses.
- **Model Customization:** Allowed users to switch between DeepSeek model versions (1.5B/3B) via dropdown.
- **Debugging Focus:** System prompt engineered to prioritize **code debugging** with strategic print statements.

Multilingual app using LLM

04/2024 – 06/2024

(python, streamlit, google gemini pro(LLM), speech_recognition (for STT))

- **Voice Interaction:** Users speak queries via microphone, converted to text using Google's speech recognition.
- **AI-Powered Responses:** Gemini Pro generates accurate, context-aware answers for diverse queries.
- **Audio Output:** Responses are vocalized using gTTS and offered as downloadable MP3 files.

Crop Recommendation System

07/2023 – 09/2023

(Python, Scikit-learn, Pandas, NumPy, and Flask)

- Developed a **machine learning-based crop the recommendation system** to help farmers select best crops based on soil, climate, and environmental factors like rainfall, temperature, and pH levels.
- Trained models like **Random Forest, SVM, or Decision Trees** on agricultural datasets for accurate predictions
- Designed a **user-friendly web interface** (using Flask/Django) for farmers to access recommendations easily with realtime input

SKILLS

Data Science

Machine Learning, NLP, Gen AI, Langchain, LLMs, RAG, Scikit-learn, NLTK, Transformers, Matplotlib, Hugging Face, Statistics, PostgreSQL, TimeScale DB

Extra Skills

Django || React.js || Html || css || Node.js || mongodb || Express.js

Languages

python(pandas/numpy), Java, C

EDUCATION

B.Tech Computer Science & Engineering

2021 – present | Dehradun, India

Tulas Institute

Percentage: 76%

High School

2018 – 2020 | Mahendranagar, Nepal

Morning Glory Secondary school

CGPA: 3.43/4

10TH

2008 – 2017 | Mahendranagar, Nepal

Batika International public school

Cgpa: 3.70/4

CERTIFICATES

- Coding Competiton Winner
- AL and ML developer

INTERESTS

Cricket || Volleyball || Travelling
